IPC Eagle Tech Bulletin HydroTube

November 1, 2011

IPC Engineering has made a change to the Pre-Filter Outlet Adaptor. A large chamfer has been added to the outlet side to prevent any restriction of water flow into the Reverse Osmosis Membrane. Customer reports of limited or no water flow through a HydroTube will be corrected by replacing the pre-filter outlet adaptor with the new revised part.

PN: BD545143 Pre-filter Outlet Adaptor Rev B
