

# Carpets, Mats, & Fabric Tough Stain Removal

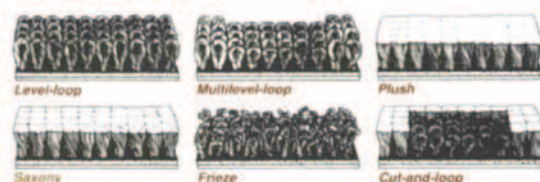

## OIL-FLO™ 141

Oil-Flo 141 Safety Solvent Cleaner will remove many stains that are considered difficult. This includes tars, oils, cosmetics, greases, toners, waxes and adhesives to name a few. Oil-Flo 141 is a unique product that is a solvent-based cleaner that works particularly well when used as instructed. Oil-Flo 141 contains no water, but is 100% water soluble, making cleanup a snap. It is colorless, non-foaming, non-flammable, biodegradable and safe to the user and environment.

When rinsed with water, it leaves no residue. It has been proven extremely valuable to the professional cleaner or carpet installer for use on carpets, fabrics and hard surfaces like wood, concrete, tile, etc.

**Problem Stain Removal** Oil-Flo 141 Safety Solvent Cleaner and Degreaser is a "wet" cleaner. It dissolves certain stains and makes them water soluble. They must then be extracted or rinsed out with plain water. Some of these stains are listed below. Note that they are mostly based on petroleum or wax, along with chewing gum and some paints.

| ✓ Chewing gum     | ✓ Grafting compounds | ✓ Sealcoat compounds     | ✓ Shoe polish   |                           |

**Unsuitable Stains** Many kinds of stains that are troublesome will not respond to Oil-Flo 141. These include rust, dyes, bleach stains, mineral deposits, perspiration, food stains, Kool-Aid, coffee, pet stains, grass, etc. There are spotters for some of these stains available from your distributor. But you should not use Oil-Flo 141 on them. And never apply it to polyester carpet fibers (See "Material Caution" section.)

**Material Caution** Carpet Fibers. Oil-Flo 141 works best on these carpet and fabric materials: wool, nylon (including Antron, Ultrun, Zeftron, Anso) and polypropylene or olefin (Herculon, Marquesa) carpets. Do not use on polyester fibers (Dacron and Trevira) which hold oily dirt and solvents. Although not found on carpets very often today, acrylic fibers also hold oily stains.
