

SG1 (2018 & After) Quick Start Guide

READ THIS

Read this guide before using your system. Failure to follow these directions voids all warranties.

Starting Out

When you first get started, this is how your cart will look. The rest of this guide will explain getting from here to cleaning windows.

Connect Filters

Connect the Carbon filter to the RO filter with the included hose.

Source Hose

Disconnect black bypass hose from bottom of Carbon/Sediment filter.

Connect your water source to the garden hose fitting on your Carbon/Sediment filter.

Open Bypass

Fully open bypass hose.
(Note: the valve should be positioned as pictured).

Wye Valve

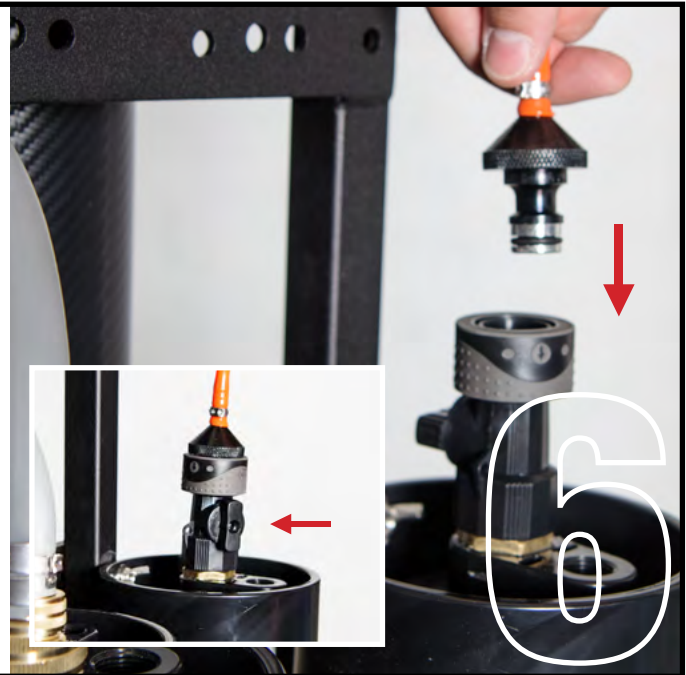

Check the brass wye valve located on the bottom of the RO filter. The valves should be positioned as pictured.

Pole

Attach Quick Connect Valve to output of DI filter.

Connect your pole using the quick connect/shut off valve provided with your system. Make sure the shut off valve is in the open position.

Turn On Water

Reduce bypass water using valve to desired discharge. 1:1 ratio of discharge to output is optimal.

At least some water must be coming out at all times while in use.

Clean Windows

Enjoy your SG1 system!
