

# SG1 Quick Start Guide

## READ THIS

Read this guide before using your system. Failure to follow these directions voids all warranties.

## Starting Out

When you first get started, this is how your cart will look. The rest of this guide will explain getting from here to cleaning windows.

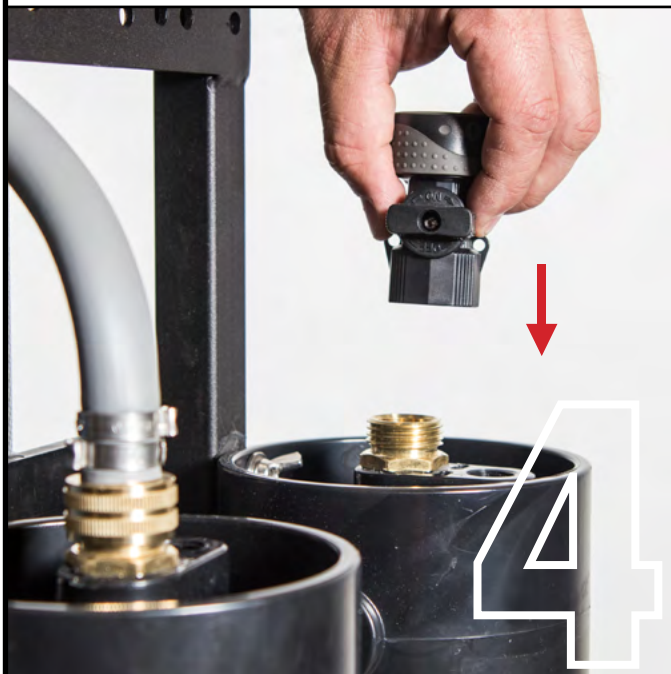

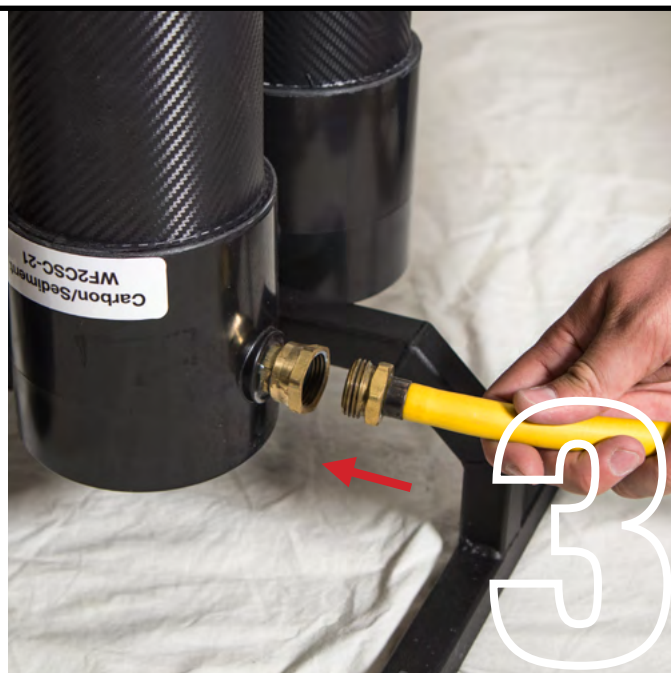

## Connect Filters

Using tools (not included) connect the Carbon filter to the RO filter with the included hose.

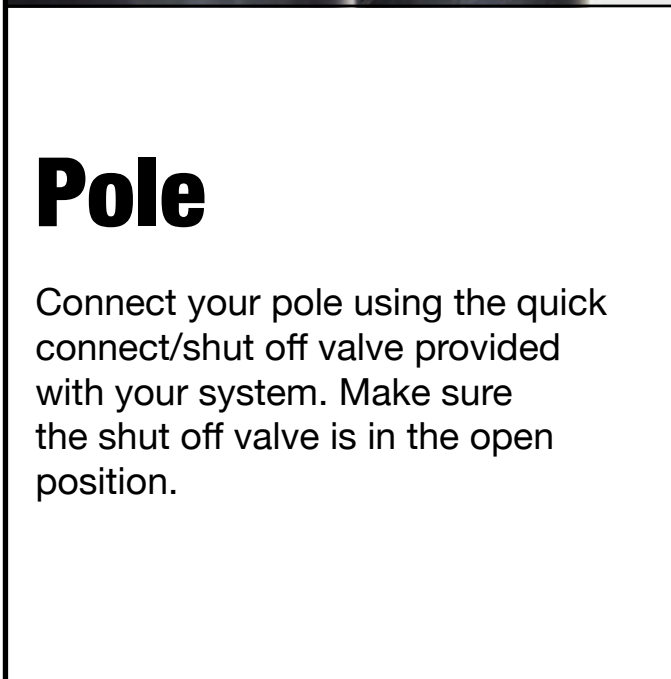

# Source Hose

Connect your water source to the garden hose fitting on your Carbon/Sediment filter.

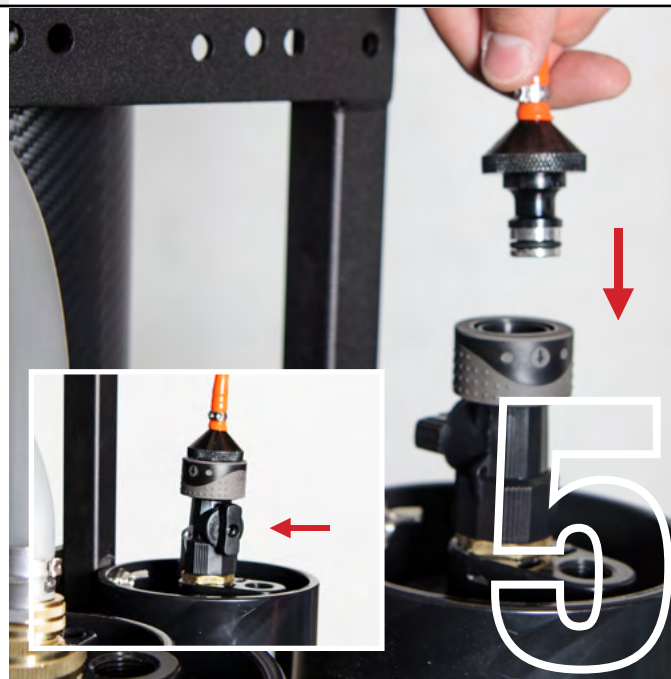

# Quick Connect

Attach Quick Connect Valve to output of DI filter.

# Pole

Connect your pole using the quick connect/shut off valve provided with your system. Make sure the shut off valve is in the open position.

# Bypass Hose

Optionally, add hose to RO bypass to redirect bypass water.

# Turn On Water

Reduce bypass water using valve to desired discharge. 1:1 ratio of discharge to output is optimal.

At least some water must be coming out at all times while in use.

# Clean Windows

Enjoy your SG1 system!
